PROFESSIONAL SUMMARY

7 years of experience as a professional software developer. Proficient in frontend technologies React & React Native. I also use Node, Express, Nest, Laravel and Kafka to build scalable backend solutions.

EDUCATIONAL QUALIFICATIONS

2020 – 2023	Master of Information Technology (University of Lagos)
2013 – 2014	National Youth Service Corps Oyo state
2006 - 2012	B.Sc. Mechanical Engineering (Obafemi Awolowo University)
2004 – 2006	OND Mechanical Engineering (Yaba College of Technology)
2000 – 2002	Senior Secondary School (School of Science Ondo road Ile-Ife)

WORK EXPERIENCE

KareGiver: Frontend Dev (2024)

- Created responsive and user-friendly interfaces using HTML, CSS, and JavaScript ensuring compatibility across various browsers and devices.
- Utilized modern frontend frameworks and libraries such as React, Vite to build dynamic and efficient web applications.
- Collaborated with team members using Git for version control, ensuring seamless integration and code management. Conducted thorough testing and debugging to ensure high-quality code and user experience.
- API Integration: Integrated RESTful APIs into frontend applications to provide seamless data interaction and dynamic content render
-

Hospyta: Backend (2023) <https://hospyta.com>

- Engineered a comprehensive microservices architecture encompassing User, E-commerce, Medical, and Wallet services using NestJs. Developed a streamlined Gateway service with Node, facilitating service-to-service communication through TCP (Kafka) and HTTPS. Implemented cron jobs management with Bull and Bull-Board.
- Utilized MongoDB throughout the architecture and executed seamless deployment on AWS for efficient server and storage management

Groupay: Full Stack & Mobile Dev (2022) <https://groupay.com.ng>

- Teamed up to construct backend APIs in Node.js (Typescript) for thrift handling.
- Demonstrated proficiency as a backend developer using FeathersJs, Typescript, Express, Node.js, Docker, MongoDB, and Postgres.

- Engineered a robust wallet and user authentication system with Nest.js. This system enables secure money transfers and seamless integration with various payment platforms.
- Revamped the application architecture of our mobile app. Track bugs with firebase making our app a 98% crash-free experience, deploy best practices with mobile technologies (React Native), code reusability, and ensure solid application performance on Android and IOS

Arvofinance: Full Stack (March 2020) <https://arvofinance.com>

- As a key backend developer at Arvofinance, I spearheaded the integration of the Loan service into the microservices architecture. My primary tools included Express, Typescript, and Node.js.
- Built mobile app for Nano Loan with React Native and Typescript
- Led a team of five backend developers in the successful migration of our API services from a monolithic to a microservices architecture. This transition notably boosted product response time, elevating the overall customer experience.
- Accomplished the seamless deployment of multiple Node.js API servers on AWS and Digital Ocean platforms

Tremendoc: Full Stack (November 2018) <https://tremendoc.com>

- In my role as the lead software developer at Tremendoc Limited, I spearheaded diverse projects, notably the creation of a comprehensive Telemedicine platform. This involved the development of web and mobile interfaces (supporting video, audio, and chat consultations) and seamless API integrations with third-party services.
- Proficient in Swift (at a junior level), React Native, Laravel, and FeatherJS, I made significant contributions as a versatile developer across various technologies.
- Played a pivotal role in implementing the Java Spring Boot API, ensuring its efficiency & scalability.

ikOOba Technologies: Full Stack (2016-2018) <https://ikooba.com>

- Software developer (Laravel, Angular, React Native, Mongo DB, GraphQL, Apollo)
- Developed Human Resources Payroll web application with Laravel framework
- Join a team to build two Hybrid mobile apps using IONC-Angular and React Native

MaSS (2014 – 2016)

- Product Manager, Lead software developer, Product research and Branding
- Developed a web based educational social game platform <https://aloc.ng/> with PHP (Laravel 4.0,5.2), HTML, CSS, JavaScript and MySQL and a mobile version REST API with android studio.
- Use lean canvas for product development and penetration

PROJECTS

Node App: <https://arvofinance.com>, <https://api.groupay.com.ng>

Laravel Web App: <https://question.aloc.ng> <https://onebmac.com>

INTEREST

- Teen coach and poultry-keeping
- Using ICT to deliver better and brighter solution
