WORK EXPERIENCE

• Mobile App Developer & Technical Lead

ARVOFINANCE.COM

March 2020- present

Totally revamped the application architecture of our mobile app and user interphase. Track bugs with firebase making our app a 98% crash-free experience, deploy best practices with mobile technologies (React Native), code reusability, and ensure solid application performance on Android and IOS

Got promoted to the Technical Team Lead position. I successfully stirred the wheel of progress for the Arvofinance financial services technologies and engineering team (backend and frontend). I stabilize the team and chucked out more product features after 3 months of taking up that role

TOOLS: Javascript, React Native, Node, Postgress

• Senior Full-Stack Developer

TREMENDOC.COM

Dec 2018 - Feb 2020

Solved the complex integration problem of video, and audio for health, fitness, and wellness mobile app development for individuals, and small and medium-scale businesses.

Implemented the Telemedicine admin dashboard with Laravel and Java spring boot API that processes audio, video, and payments.

As the Technical Lead, I interphase with 3 Nigerian banks as we integrate our telemedicine services into bank web portals and mobile apps.

Our services were also structured in a way that gives room for external API consumption and to create third parties on-demand API.

TOOLS: Java Spring Boot, Laravel, React Native, FeatherJs, Android Java., Snich

• Full-Stack Software Engineer

IKOOBA TECHNOLOGIES

Sept 2016 - Nov 2018

Developed Human resource and Payroll web portal with Laravel. The application was used by 10 organizations with an average of 80 employees

In response to client needs, I also joined in the development of an Inventory management system for Java desktop applications.

• Founder/Lead Software Engineer

MASSIVE-TECH

Nov 2013 - Aug 2016

- Act in the capacity of Product Manager, Lead software developer, Product research and Branding
- Developed a web-based educational social game platform <https://aloc.ng> with PHP (Laravel 4.0,5.2) JavaScript and MySQL and a mobile version REST API with android studio.
- Use lean canvas for product development and penetration
- Developed sales and inventory management software for 5vibes Ile-Ife
- Developed photo management software with C# and SQL using Visual studio
- Developed register management software for OAU Alumina Ile Ife with C#
